

Transforming Transactions
into Relationships

NCR FastLane™

NCR FastLane, modular by design, offers a variety of configurations to fit real-world retail environments. We understand that one-size-fits-all solutions do not satisfy all retail chains. That is why NCR FastLane provides you with the options to customize a solution that fits best into your stores.

An assortment of input and output modules provides retailers with many options. Depending on the size of a store's front-end as well as the transaction sizes anticipated by the retailer, there are many options from which to choose. The merchandise unload area can be configured using a small basket-sized shelf or an input conveyor belt, or it can be designed without either, allowing consumers to select and scan items directly from a shopping cart. For collection of items, NCR FastLane accommodates up to three bags or a take-away conveyor belt. Any combination of these components can be chosen to build a solution that is just right for you. The best part is that no matter which configuration you install, NCR offers the unique ability to upgrade the lane if you determine there may be a more appropriate configuration.

NCR's global Professional and Customer Services teams can assist in all your servicing needs, including consulting, integration, maintenance, and support of NCR FastLane. In fact, NCR Professional Services consultants will work with you to design a self-checkout solution to best meet your needs.

NCR FastLane

- All models available in left-to-right and right-to-left scanning orientations except for Take Away belt model (left-to-right only).
- All models are compatible with Sensormatic and Checkpoint EAS devices.
